INNOVATIVE PRODUCTS FOR G, J AND GJ-TUBES - INTRODUCTION

Halyard Health, a leader in the enteral feeding market, offers a wide variety of innovative, high-quality enteral feeding tubes, placement kits and accessories uniquely designed for delivering nutrition and medication to paediatric and adult patients.

As the pioneer in the development of the first balloon retained tube designed for gastrostomy feeding, Halyard continues to manufacture tubes and accessories with the highest standards of workmanship at our state-of-the-art manufacturing facilities.

Our products provide consistent performance and are designed for safety and convenience. For this reason our MIC* and MIC-KEY* feeding tubes are now equipped with the ENFit™ connector. This connector is designed to connect only to other ENFit™ compatible devices, so that only enteral fluids are given down the feeding tube.

We stand behind our products with knowledgeable sales and customer service professionals. Today, our MIC*/MIC-KEY* brand of Enteral Feeding Tubes is well recognised and accepted among healthcare professionals for intermediate and long-term feeding applications.

MIC*/MIC-KEY*

Enterostomy Tubes

INNOVATIVE PRODUCT DESIGNS

MIC*/MIC-KEY* Enteral Feeding Tubes and Accessories include a wide variety of innovative product designs for gastric, jejunal and gastro-jejunal access: from the lock-and-key design of the MIC-KEY* Feeding Tube extension set connection mechanism, to the one-piece MIC-KEY* GJ Feeding Tube that allows simultaneous gastric decompression and jejunal feeding.

MOST MIC*/MIC-KEY* ENTEROSTOMY TUBES INCLUDE:

- High-clarity, medical-grade silicone construction, designed for visibility and drapability;
- Ventilated SECUR-LOK* ring, the external retention mechanism designed to allow air to circulate around the stoma site and reduce tube pressure 360° from the sides of the stoma wall;
- An inflatable internal retention balloon, which reduces patient trauma experienced with obturated devices;
- ENFit™ feeding port and medication port compliant to the ISO80369-3 standard.

THE RIGHT CHOICE

Helping your patients face the use of a gastrostomy tube, possibly for a lifetime, can be a challenge. Halyard's variety of quality feeding tubes and accessories helps you make the right choice for your patient. By selecting MIC*/MIC-KEY* Enterostomy Tubes, you may be assured that you have chosen innovative products that consistently perform and are well recognised and accepted among healthcare professionals.
